Resume Summary

Motivated and detail-oriented React.js developer with a strong foundation in JavaScript, HTML, CSS, and front-end development principles. Skilled in building responsive web applications using React.js and integrating APIs. Eager to apply my knowledge to contribute to dynamic development teams and deliver user-friendly interfaces. Strong problem-solving skills with a focus on writing clean, maintainable code. Currently expanding my expertise in backend technologies like Node.js and MongoDB.

Skills

- **Front-End**: React.js, JavaScript (ES6+), HTML5, CSS3, Material UI, Bootstrap
- **Back-End**: Node.js, Express.js
- **Database**: MySQL
- Version Control: Git, GitHub
- Deployment: Netlify, Heroku, Render

Education

Bachelor of Computer Applications
Dibrugarh University
D.H.S.K College Dibrugarh

Master of Computer Applications
Bangalore City University
Presidency College Bangalore

Projects

ILCT_Platform
ReactJS, Nodejs + Express + Socket, MySQL
The ILCT Platform is a collaborative online tool designed to enhance interactive learning and communication within educational or professional settings. Featuring **real-time** database update when a user join, delete, update, send messages or perform jamboard activity in a channel.
